

Nature 2 Spa Water Purifier (3 Pack)

\$129.97

The Nature2 Spa Water Purifier is designed to save you time and money while maintaining a beautiful spa.

Your water will be cleaner and safer than ever before and odor free as well.

The Nature2 Spa Purifier is a very simple system to use. The Nature2 is a plastic cartridge that contains minerals such as copper and silver that sanitize the water as it passes through the cartridge.

Description

Each purifier lasts up to four months. Using it is simple. It is inserted into the center of your filter cartridge and remains there until it needs to be changed. It is recommended that you drain and clean your spa before starting to use the Nature2 Spa Purifier. It is required if you are presently using bromine. It easily slides into the core of all spa filters.

The Nature2 is not compatible with bromine.

The Nature2 keeps bacteria levels 100 times lower than the EPA requires for drinking water. Caring for the chemical balance of your spa does not change. You still need to chemically balance the pH, total alkalinity and calcium hardness levels as needed. The only additional chemical that needs to be added is a non-chlorine oxidizer once a week. Only a few ounces of this product is required.
